

# **KRACK HOG PRECISION SPLITTER**

No more shimming wall block to make a clean split. The Krack Hog makes cutting and dressing block clean and easy.

The Krack Hog works with an easily pumped hydraulic foot action pedal, which raises the bottom hardened steel blade. Once the blade meets the stone, it is compressed against the upper blade creating a clean break. This means no more long lever pole sending shock waves up and down your back like other splitters.

With two hardened steel blades, we've eliminated the need for expensive diamond blades and blade replacements. The Krack Hog provides a wide wheelbase for easy transportation on rough job site terrain and can be moved into a skid bucket or trailer without toppling over.

- Dust free
- Quiet
- Reduce costs on labor and replacement blades

Features:

- 20 Ton Power
- 40,000 PSI
- Split Blocks 1 1/2" to 8"
- Pre-Measured Splitting Table: 18 3/8" x 16" (Additional Size Table Available)
- 24" Wheelbase allows for easy transportation around job sites
- Weight: 200lbs (91kgs)
- 2 Year Warranty
- Made in the USA
